## measuring worksheet - Roman Blinds

Hints:
-Use a metal tape measure, measure in millimeters.
-Measure width first, from outside edge of frame to outside edge of frame. Then add an extra 100 mm (i.e. 50 mm for each side)
-For the drop, measure the height from the top edge of frames to lowest point of the frame. Then add 150 mm (i.e. 100 mm for above the top of frame and 50 mm for the bottom of the frame).

- Choose your control side, left or right.
- Choose the length you would like for your control chain.

Use this information to complete the ordering section on the website.

| Window Location / <br> Number | Width (mm) | Height (mm) | Fabric Colour | Control Side | Control Length |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |
