## mEasuring workshet - Roller Blinds

Hints:
-Measure exactly where you would like the blind to fit. (Allowances are made at the factory)
-Use a metal tape measure.
-Always measure width (horizontal) first then length (vertical).
-Measure the width at the top, middle and bottom and use the top measurement.
-Measure the length at both sides and the middle. Use the smallest measurement.

| Window Location/Number | Inside / Outside Fit | Width <br> (mm) | Height <br> (mm) | Control Side L / R | $\begin{gathered} \hline \text { Front / } \\ \text { Back } \\ \text { Roll } \end{gathered}$ | Fabric Colour | Control Unit colour | Chain Colour | Bottom Rail Colour | Chain Length |
